PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience building full-stack web applications using React, JavaScript, Python, Django REST Framework, Node.js, Express.js, and SQL. Skilled in developing RESTful APIs, implementing JWT authentication, integrating databases, and building responsive, scalable applications. Strong interest in software engineering, problem-solving, Generative AI, and machine learning, with experience applying modern AI-assisted development practices to real-world projects.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Frontend: HTML5, CSS3, React
Backend: Node.js, Express.js, Django, Django REST Framework
APIs & Security: REST APIs, JWT Authentication
Tools & AI: Git, GitHub, Generative AI, Prompt Engineering, AI-Assisted Development

EDUCATION

ANDHRA UNIVERSITY COLLEGE OF ENGINEERING B.Tech in Information Technology Visakhapatnam, India	2022–2026 GPA: 8.77/10
SASI JUNIOR COLLEGE Intermediate (MPC) West Godavari, India	2020–2022 96.8%
SRI CHAITANYA SCHOOL 10th Standard West Godavari, India	2019–2020 98%

PROJECTS

Hostel Room Allocation System | React, Django REST Framework, PostgreSQL, JWT

- Developed a full-stack hostel room allocation system in React and Django REST that enabled 100+ students to submit profiles, view eligible rooms, and complete bookings via a responsive UI.
- Implemented Django REST APIs with JWT authentication and role-based access control to securely manage student profiles, room availability and booking operations.
- Designed backend allocation logic based on student academic year and hostel rules, with room availability updates to prevent duplicate room allocation.

Bharath Heritage | HTML5, CSS3, JavaScript, WebAR, REST APIs

- Built an interactive digital heritage platform covering all 28 Indian states, delivering immersive cultural content via a responsive web interface to many users.
- Integrated WebAR-based virtual experiences and interactive features to provide users with an immersive way to explore Indian culture and heritage.
- Added AI-powered quiz functionality and integrated third-party e-commerce APIs to extend the platform beyond static cultural content.

Bus Booking System | React, Python, Django REST Framework, SQL, JWT

- Developed a full-stack bus booking platform supporting route search, seat availability, booking and cancellation workflows through a responsive React frontend.
- Built RESTful Django APIs for authentication, route management, seat inventory and booking operations with SQL database integration.
- Implemented backend validation and booking logic to maintain accurate seat availability and prevent duplicate reservations.

WORK EXPERIENCE

HMIFS SOLUTIONS — Visakhapatnam, India Jun 2025 – Aug 2025 Artificial Intelligence Intern

- Applied Python data preprocessing, regression modeling, and evaluation with NumPy, Pandas, Matplotlib, and scikit-learn to prepare datasets for a student marks prediction model achieving 92% accuracy.
- Developed a student marks prediction model using machine learning workflows.

ANDHRA UNIVERSITY — Visakhapatnam, India 2025 Full Stack Development with Python – Workshop

- Completed hands-on modules and assignments covering Python full-stack development concepts.

HACKATHONS

Build Bharath AI Hackathon — Andhra University, Visakhapatnam — Participated in a national-level AI hackathon and developed a prototype with a team of four.

Techno Hackathon — ANITS College, Visakhapatnam — Developed a functional web application prototype within 24 hours.

CERTIFICATIONS

Prompt Engineering (Verified) — FreeCademy.ai | Aug 2026
Introduction to Generative AI and Agents — LinkedIn Learning | Jul 2026
